

Responsible Mineral Sourcing Policy

Aptyx is committed to respecting human rights and preventing abuses in our supply chain, especially regarding conflict minerals. We do not knowingly purchase materials that contain these minerals.

Conflict minerals—tungsten, tantalum, tin, and gold (3TG)—are often mined in areas of armed conflict and human rights violations, particularly in the Democratic Republic of the Congo (DRC). They are used in various products, including electronics and jewelry.

While we do not source minerals directly from mines, our supply chain includes multiple tiers, such as traders, smelters, and manufacturers, before reaching our direct suppliers.

Aptyx applies due diligence to ensure no conflict minerals enter our supply chain.
