

Our Interventional Expertise. Your Impactful Applications.

From concept to commercialization, Aptyx is your single-source partner for bringing sophisticated interventional and transcatheter devices to market. With deep technical expertise and fully integrated capabilities, we help you shape what's next in minimally invasive innovation. From first sketch to final shipment – we make it happen.

Certification

Projects That Prove It – We Made It Happen.

- ePTFE covered stent and delivery systems
- ePTFE covered frames
- AAA stent grafts & delivery systems
- Aortic dissection stent systems
- Pediatric heart valves
- Left atrial appendage systems
- Annuloplasty rings
- Bioabsorbable vascular closure devices
- Pressure sensing access systems
- Drug delivery systems
- Carotid stent and delivery systems
- Distal embolic protection filters
- Gastrointestinal systems
- Spinal fusion tissue implants
- And other challenging projects

its Potential in Medical Devices

Innovative Implants

Material Expertise For Your Implanted Device.

OUR IMPLANTED MATERIAL EXPERIENCE

- PTFE and ePTFE
- Bioabsorbable / Absorbable
- Polyurethanes
- Liquid Crystalline Polymer (LCP)
- Polyester
- Silicone Rubber
- PEEK
- Polysulfone
- Nitinol
- Stainless Steel
- Other metals such as: Titanium, Cobalt-Chromium, Gold, Platinum, Platinum-Iridium

Your Products Are Our Purpose.

▶ MAKE IT HAPPEN MINDSET

An entrepreneurial mindset is part of our DNA: Get it done. Don't settle. Take action.

▶ EXPERT IS IN

We've built a network of cross-industry experts and make-it-happen leaders whose creativity and innovation have changed the course of their industries.

▶ CUSTOMER-CENTRIC CULTURE & PARTNERSHIP

We take the time to listen and truly understand your needs to build the foundation of a trusting, long-lasting partnership.

▶ INTEGRATED, SPECIALIZED CAPABILITIES

Simplify your supply chain with a single-source partner you can rely on for a full range of engineering and manufacturing capabilities.

▶ GLOBAL NETWORK OF FACILITIES

With domestic, near-shore, off-shore, and low-cost manufacturing capabilities, we can meet the unique demands of your mission-critical complex component or device.
